*courses yet to be completed

PROJECTS

❖ **Todo Application**(<https://github.com/Nareshyadavchinnala/todo.git>)

Description: Developed a dynamic and responsive To-

Do List application using HTML, CSS, JavaScript, and Bootstrap. The application allows users to add, edit, and delete tasks, helping users manage their daily activities efficiently.

Key Features:

- **Add and Remove Tasks:** Users can easily add new tasks and remove completed or unnecessary tasks.
- **Edit Tasks:** Allows users to edit existing tasks to keep their to-do list up to date.
- **Responsive Design:** Utilized Bootstrap to ensure the application is mobile-friendly and works seamlessly on all devices.
- **Persistent Data Storage:** Implemented local storage to save tasks even after the browser is closed.

Technologies used: HTML, CSS, JS, Bootstrap

❖ **Weather App** (<https://github.com/Nareshyadavchinnala/weather-report.git>)

Description: Developed an interactive and visually appealing Weather Application using HTML, CSS, JavaScript, and Bootstrap. The application fetches real-time weather data and provides users with accurate weather updates.

Key Features:

- **Real-Time Weather Data:** Displays current weather conditions, including temperature, humidity, and weather descriptions.
- **Search Functionality:** Allows users to search for weather updates by city.
- **Responsive Design:** Utilized Bootstrap to ensure the application is mobile-friendly and performs well on various devices.
- **Dynamic Backgrounds:** Changes background images based on the current weather conditions for an immersive user experience.

Technologies used: HTML, CSS, JS, Bootstrap

❖ **Random password generator**

(<https://github.com/Nareshyadavchinnala/randompassword-generator.git>)

Description: Developed a secure and user-friendly Random Password Generator application using HTML, CSS, JavaScript, and Bootstrap. This application allows users to generate strong, random passwords to enhance their online security.

Key Features:

- **Password Generation:** Allows users to generate passwords of customizable length with options to include uppercase, lowercase, numbers, and special characters.
- **Copy to Clipboard:** Includes a feature to easily copy generated passwords to the clipboard for convenience.
- **Responsive Design:** Utilized Bootstrap to ensure the application is fully responsive and accessible on all devices.
- **Real-Time Feedback**

Technologies used: HTML, CSS, JS, Bootstrap

WORK EXPERIENCE

Wipro (Associate Analyst) Dec 2021 - Apr 2023 *hyderabad, Telangana* worked as tech support solving tickets which raised by developer.
